

## Key Investor Information

*This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Sub-fund. You are advised to read it so you can make an informed decision about whether to invest.*

## DIVERSIFIED PORTFOLIO - CYPANGA SICAV SIF

### Unit PA3 EUR Acc (ISIN: LU2234853328)

This sub-fund of CYPANGA SICAV SIF is managed by **Cypanga Asset Management** (the AIFM) and shares are exclusively dedicated to Eligible Investors whom definition is given by Article 2 of Luxembourg Law of February 13<sup>th</sup> 2007 relating to Specialized Investment Fund.

### Objectives and investment policy

The aim of the sub-fund is to provide a capital appreciation over the medium to long term that is higher than the consumer price index in the euro zone (CPI Eurozone), measured by the Bloomberg EACPI Index (the CPI Eurozone index is only mentioned as an indicator and the sub-fund does not intend to track this index). To achieve this objective, the sub-fund follows a discretionary investment policy and allocates its investments, directly or through third-party funds, in different asset classes: equities (listed and unlisted), bonds (private or public), commodities, currencies and money market.

The choice of investments is based solely on the discretionary analysis of the AIFM, without any constraints regarding the geographical area, the capitalization size, or the rating. This can lead to a strong preponderance of one or more asset classes to the detriment of others and significantly alter the risk profile of the portfolio.

The sub-fund may invest up to 100% of its net assets in units or shares of investment funds. Selected third-party funds may use alternative strategies to achieve returns that are uncorrelated with changes in international financial markets. These strategies can use financial derivative instruments and generate significant leverage within these third-party funds.

At the sub-fund level, the use of financial derivative instruments is limited to hedging the portfolio against a decline in certain asset classes and total leverage arising from financial derivative instruments is limited to 100% of its net assets.

The Sub-Fund does not integrate the sustainability risks in its investment objectives and policies as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (SFDR).

The Net Asset Value of the sub-fund is published monthly and dated as of the last calendar day of each month. Redemption requests are centralized before 16:00 in Luxembourg, at the latest 90 calendar days before the applicable valuation day.

The sub-fund can suffer important capital losses and may not be suitable for investors planning to withdraw their investment within three years. The Sub-fund is actively managed and its reference benchmark mentioned in the Investment Objective above does not necessarily represent the investment universe or a constraint for the portfolio allocation of the Sub-fund.

Currency of this share class is EUR and income is reinvested.

### Risk and reward profile

This indicator represents the annual historical volatility of the sub-fund over a 5-year period, its aim is to help investors understand the uncertainty attached to gains and losses that may have an impact on their investment. Historical data used to calculate this indicator may not be a reliable indication of the future risk profile of the sub-fund.

The risk category of this sub-fund is not guaranteed and may change over time. Category 1 does not mean the investment is risk-free and the sub-fund's capital is not guaranteed.

This sub-fund is placed in category 4 owing to its diversified exposure to equity markets as well as interest rate, credit, and currency risks. However, no minimum diversification is imposed to the fund, as a result it may be highly concentrated on one or more asset classes and have a much riskier profile than its current profile.

#### Other material risks for the sub-fund that are not taken into account in the Indicator:

The sub-fund can invest in less liquid assets that may be difficult to sell in distressed markets.

The sub-fund can invest in Private Equity, directly or through third-party funds, hence considerably reducing the overall liquidity of the sub-fund.

The sub-fund can invest in non-regulated third-party funds that have lockups or highly restrictive redemption notices, hence considerably reducing the overall liquidity of the sub-fund.

The sub-fund may use derivatives which can reduce investor risks or give rise to market risks as well as potential loss due to failure of counterparty.

Sub-investment grade bonds are usually subject to a high credit risk (i.e. potential loss due to failure of issuer).

Every sub-fund reveals specific risks, a detailed and comprehensive list of risk descriptions can be found in the prospectus.

## Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing, and distributing it. These charges reduce the potential growth of your investment. For more information on fees, charges, and liquidity risk premium calculation methods, please refer to the prospectus available at [www.cypanga.com](http://www.cypanga.com).

### One-off charges taken before or after you invest

Entry / exit charges: **5,00%**

Conversion charge: **0,00%**

### Charges taken from the fund over a year

Ongoing charges\*: **0,96%**

### Charges taken from the fund under certain specific conditions
